

ABOUT US

Founded by a dreamer named Dani SYED, KIDAN is one of the fastest growing Swiss technology integrator, internationally recognized for helping organizations master the complexity of modern technologies. As part of the visionary family-owned ENIXEN Group, we combine the agility of an entrepreneurial business with the discipline and reach of a world-class organization.

Headquartered in Switzerland, KIDAN partners with over 1'300 enterprises and 70 resellers, delivering secure, scalable, and innovative solutions that power business growth. Our expertise covers every stage of the IT journey from assessment and advisory, to solution design, implementation, and ongoing optimization.

Furthermore, as both a Value-Added Reseller (VAR) and a Value-Added Distributor (VAD), we bring together the world's leading technologies, including ManageEngine, SentinelOne, Sangfor, Cloudflare, Zoho, and ColorTokens - and integrate them seamlessly to solve your unique challenges and initiate digital transformations for you.

With +100 persons in our international and culturally-diverse teams, our mission is simple: **to help you design, create, understand, manage, and secure your technologies** so they can become a catalyst for performance, resilience, and long-term success.

What truly sets KIDAN apart is our philosophy. Rooted in Swiss excellence and shaped by our family values: **Innovation, Integrity, Care, and People-Centricity** - we don't just deliver solutions; we build trusted partnerships for the future.

KIDAN. Family-owned. International by design. Powered by ENIXEN.

Dreaming of a greater technology-driven future for all.
